Dear Don,

Re: Endorsement of Sonic Dry Cleaning Unit

We wish to confirm with you our complete satisfaction in the performance and support of the SDC-4 Sonic Dry Cleaning system we have commissioned at the Century Mine Site in Far North Queensland Australia.

This machine supports a mining fleet consisting of more than 50 pieces of mining equipment as well as a large volume of contractor machinery. Over past three years the Sonic machine has supported the fleet working on a 24 hour 7 day basis in adverse conditions. It has maintained a high level of availability and reliability.

We have significantly reduced our filter costs by utilising the SDC-4 system. This site is quite remote, being able to clean filters quickly and efficiently without the need to send them off site is a distinct advantage.

We would be happy to discuss this machine with any of your prospective clients should they wish to contact us.

Yours Faithfully

Mark Furlong
