POWAY CA 92064-7102

Dear Don

Westrac Equipment Pty is the largest dealer of Caterpillar Equipment in Australia. Historically, maintenance practices for air filter change-outs required the disposal of dirty air filters and the costly purchase and installation of new air filters. Due to the continued unacceptable cost of this practice and new environmental constraints imposed at one of our mine sites, we required a Filter Cleaning System that would enable us to reduce costs and help us meet environmental mandates.

After extensively researching and seeing demonstrations of air filter cleaning systems in both Europe and the United States, the fully automatic and completely self-contained Sonic System SDC-4, by Sonic Dry Clean, Inc. was selected and installed in 1998 to allow for the re-use of the structurally in-tact air filters that were previously discarded.

Since Westrac Equipment began using the Sonic System we have saved thousands of dollars in both new air filter purchases and hazardous waste disposal costs. Over the last (2) two years we have been extremely pleased with the quality of the cleaning operation, the high rate of return on our investment and the minimal maintenance and training requirements of the unit.

Westrac Equipment recommends the fully-automatic, Sonic Dry Clean System for any company wishing to reduce operational costs associated with their air filter cartridges.
